¹ Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as: (N/EH) x 20,000,000 where

EH

 number of injuries and illnesses
 total hours worked by all employees during calendar year
 base for 10,000 equivalent full-time workers (working 40 hours per week, 20,000,000

50 weeks per year).

NOTE: Dashes indicate data that are not available. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.
